WORK EXPERIENCE

Tata Consultancy Services limited

Software Developer | React.js | JavaScript | Frontend Engineer   10 Feb 2022 - Present

- Utilized **React.js** and modern **JavaScript (ES6+)** to develop and refactor **scalable, reusable components** using **functional components** and **React Hooks** (useEffect,useState), improving UI consistency and user experience.
- Collaborated with international clients (Pan-European and Middle Eastern banks) to gather requirements and demo features and ensure timely, high-quality delivery.
- Worked in Agile teams using **Git** and **GitHub** for version control and code collaboration.

PROJECTS

Personal Portfolio Website – SPA ↗

- Built a **single-page portfolio application (SPA)** to showcase projects, skills, and experience in a visually appealing layout.
- Implemented **smooth scrolling navigation** using react-scroll to transition between sections like About, Projects, Skills, and Contact

WatchWise – Controlled YouTube Viewer

- Developed a **React-based video viewing app** for **safe and focused YouTube consumption** without distractions.
- Enabled **admin users to add and assign curated YouTube video URLs** to regular users, ensuring controlled content access.
- Built using **React functional components**, **React Router**, and **state management with hooks**.

FoodApp-Swiggy API

- Built a **React-based food ordering interface** that fetches live restaurant and menu data from Swiggy's API and implemented functionalities like **restaurant listing**, **menu viewing**, and **search**
- Used **React Router** for seamless navigation between the home page and individual restaurant detail pages and handled asynchronous data fetching with **useEffect** .
- Optimized performance using **conditional rendering and lazy loading.**
